NOVA™

WS-400

designed by *pininfarina*

Easy screw release paint cup system

The new screw design fluid joint enables rapid screwing and unscrewing of the paint cup using only one hand.

Perfect balance

For the first time, the angle of the cup has been designed with both disposable and standard cups in mind. The **SUPERNOVA** design guarantees perfect balance, even when using disposable cups which, being wider and sometimes longer, could affect balance.

Quick and easy release cap

No need for a removable baffle on the front of the gun, which means fewer spare parts! The air cap has a larger thread, making it both robust and easy to remove and has been designed with low maintenance in mind. The new, larger slots in the air cap ring facilitate quick removal and refitting after cleaning.

Precise settings

SUPERNOVA is equipped with high precision adjustment controls for setting air, fluid and fan pattern. Moreover, the carefully designed grip gives the professional painter an easy feel, even when wearing latex gloves.

Base coat and Clear coat optimised spray design

Ideal for waterborne base coats and HS clear paints. **WS400** has two specially designed nozzle and needle sets, to give you optimal control during base and clear applications. This, combined with the flat and thin fan patterns, gives the professional painter the control and performance required in a fast throughput environment.

Responsive Trigger Action

The responsive trigger action gives the painter complete control when applying tricky basecoats and final coats.

Superior surface quality – Ergonomic grip

The slim ergonomic grip of the **SUPERNOVA** spray gun helps distribute weight and balance through the wrist, reducing the risk of repetitive strains.
